

Student Application

There should be a separate student application and registration process. A sample application follows. The parent makes application for the student and the student records, recommendations and testing are reviewed. If it is determined that the school can meet the needs of the student, the student is accepted. A letter should be sent to that effect along with registration papers. The principal should authorize the acceptance. There should be a yearly re-registration process. Families who will not be invited to return should not receive a re-registration application.
